

el::base::NoCopy

el::base::threading::ThreadSafe

el::base::VRegistry

```
classDiagram
    el::base::VRegistry --|> el::base::NoCopy
    el::base::VRegistry --|> el::base::threading::ThreadSafe
```

The diagram illustrates a class hierarchy where `el::base::VRegistry` is the base class. Two derived classes, `el::base::NoCopy` and `el::base::threading::ThreadSafe`, inherit from it. The inheritance is indicated by solid lines with hollow triangular heads pointing from the derived classes to the base class.
